SUMMARY

Product manager deploying AI employees for enterprise customers, owning rollouts from pre-launch to stabilization and turning customer feedback into product improvements with Engineering, AI, and Support.

EXPERIENCE

PrimeRole **Mar 2025 – Mar 2026**
Associate Product Manager *AI Employees for Enterprise Clients*

- Led end-to-end rollouts of AI employees across **10+** customer sites, from pre-launch through stabilization, cutting go-live time by **30%**.
- Built the deployment playbook and onboarding SOPs that standardized rollouts, getting new enterprise clients to value **35%** faster.
- Partnered with Engineering, AI, and Support to resolve **50+** live-site issues **40%** faster and ship **15+** customer-requested enhancements, lifting adoption by **25%**.
- Shipped features for the sales intelligence platform ahead of the AI pivot, including a power dialer for high-volume prospect calling.

LambdaTest **Jun 2024 – Oct 2024**
Product Intern *AI-Native Software Testing Platform*

- Supported Product Managers on HyperExecute, LambdaTest's test orchestration platform, across experimentation, funnel analysis, and go-to-market.
- Ran A/B experiments across acquisition channels to improve user activation and trial conversion.
- Grew qualified top-of-funnel leads by **15%** through sharper audience targeting and cleaner funnel tracking in Salesforce.
- Validated market demand in key tech segments, working with Account Executives on targeted outreach that converted prospects into product trials.

PROJECTS

- **NextLeap PM Fellowship:** Awarded **Top Fellow** in a 3-month cohort for a YouTube Premium case study, analyzing insights from **1,200+** users to design a smart offline download scheduler aimed at lifting engagement, retention, and revenue.
- **MakeDecks:** Co-built an AI presentation maker that turns notes, PDFs, spreadsheets, links, or YouTube videos into editable decks that export natively to PowerPoint, Google Slides, and PDF; launched on a freemium model with a **$15/mo** Pro tier.
- **ezflow:** Co-built a privacy-first dictation app for Mac: hold a key, speak, and text appears in any app at **127 ms** median latency, with all audio processed on-device and no cloud calls.
